

YOUR HOSPITALIZED PET

We strive to keep the length of hospital stays as brief and as comfortable as possible. During hospital hours, your pet will be under constant supervision; we monitor his/her condition and vital functions and assure your pet has clean bedding, food, water, and caring attention.

Our caregivers are available to answer any questions or concerns and will call to inform you of your pet's progress.

BOARDING

We know you want to leave your cat with someone you trust when you go away. Our feline guests are pampered in spacious and clean kitty condos, most with window views. Each cat is regularly monitored to ensure his or her health, safety, and happiness.

PAYMENT AND FEES

Every effort is made to ensure that all fees are fair and reasonable. You are encouraged to discuss charges before services are rendered. All fees are to be paid at the time service is rendered or when your pet is discharged. Cash, checks, debit, and most major credit cards are accepted.

As a service to our clients, we offer Care-Credit®, a GE Money Company, that gives you convenient interest-free or low monthly payment options.

EMERGENCY SERVICES

Please call us at once if there is an emergency. During hospital hours, seriously ill animals are given priority attention over routine appointments. A doctor is available by phone after hours to help you determine whether your pet can be treated at home or should be taken to a local pet emergency hospital.

HOW TO FIND US

NJ TURNPIKE: Exit 8A (Jamesburg/Monroe) to 32E (Forsgate Drive). RIGHT on Applegarth. LEFT on Prospect Plains Road.

Hours By Appointment

Welcome to Monroe Animal Hospital

We are committed to providing top quality comprehensive health care to your pets.

To achieve this we:

- treat our patients as if they were our own pets and offer you the services that you deserve.
- provide top quality medicine tailored to the specific needs of your pet.
- are dedicated to client education and providing you with information to make appropriate decisions for your animal companion.
- focus on prevention, management, and treatment of pain.

Thank you for choosing us for your animal's medical needs. We value your trust.

YOUR PET'S CAREGIVERS

Our professional staff is compassionate, knowledgeable, and utilizes the latest technological advances to provide exceptional medical care. We participate in continuing education and regular staff training as a means to guarantee the best care possible for our patients and keep them aware of the rapid advances in veterinary medicine.

Dr Hornstein is President of the NJ State Veterinary Medical Association (VMA), is a member of the International Veterinary Academy of Pain Management, served as President of the Northern NJ chapter VMA and has been honored as *Veterinarian of the Year.*

Medical Director, Steven E. Hornstein and friend.

EXOTIC SPECIES In addition to cats and dogs, we treat birds, ferrets, rabbits, rodents, and other exotic pets. We can advise you about maintaining a proper environment and diet for your exotic animal.

PAIN MANAGEMENT We take pain relief very seriously and employ preventive pain management strategies using local anesthetics, anti-inflammatory drugs, and other analgesic medications for all surgical procedures, wounds, dental extractions, arthritic-related problems, and pain inducing illnesses.

LABORATORY If your pet is sick or injured, and immediate results are needed, our laboratory gives us the ability to get results in minutes.

SURGERY We perform a variety of general soft tissue surgery. To ensure safety, all surgical patients are watched with top-line monitoring equipment.

PHARMACY Our pharmacy has a complete inventory of pharmaceuticals, nutraceuticals, shampoos, heartworm preventives, and parasite medications to meet your pet's needs.

RADIOLOGY On-site digital x-ray equipment provides high-quality radiographs to aid in the diagnosis of many disorders. All x-rays are reviewed by a board certified radiologist and you will have the capability to view these images anywhere at anytime.

ULTRASOUND Specialists perform abdominal and chest ultrasounds and provide rapid interpretation to aid in the treatment of your pet.

INDIVIDUALIZED HEALTH CARE

We custom design a preventive health care plan and vaccination schedule to meet the individual needs of your pet.

PROGRESSIVE DENTAL CARE

Periodontal disease is the number one health problem in cats and dogs over three years old. Dental disease puts stress on your pet's body and can lead to serious liver, kidney, and heart disease. We provide an extensive dental care program and use the safest anesthesia available along with advanced monitoring, dental x-rays, fluoride treatment, ultrasonic scaling and polishing.

Our preventive dental services include teeth cleaning, polishing, extractions, dental x-rays, and oral surgery. We have special training in dental procedures to ensure that your pet receives the best possible care.

Preventive dental care may add years to your pets' lives while improving their quality of life.

ADDRESSING THE NEEDS OF OLDER PETS

Dogs and cats over seven years old are considered seniors and need special attention. To keep pets feeling their best, and with you as long as possible, bi-annual checkups are recommended that include diagnostic testing to screen for common geriatric disorders. Older pets are at higher risk for cancer, diabetes, kidney disease, and other serious medical conditions. Often these conditions come on gradually, and owners may not detect the discomfort they may cause.
